EXPERIENCE

Digital Designer (Product & AI Ops)

LH Home | Vancouver, BC
May 2024 - Present

- Developed multiple internal tools and apps, including AI-powered solutions that cut vendor costs by 80%.
- Own and manage the end-to-end digital asset pipeline for two Shopify storefronts, improving content velocity and quality.
- Designed a partner onboarding flow that reduced support touchpoints and accelerated time-to-first-order.
- Designed and built SAP (B1UP) dashboards to eliminate manual reporting and improve operational visibility.
- Built workflow automations and custom GPTs, cutting content preparation time by ~60%.

Head of Product, Founder & CEO

Aviano | Tehran, Iran
October 2019 - April 2024

- Bootstrapped a design & development studio to 15 employees, achieving 25% YoY revenue growth over four years.
- Led a multidisciplinary team delivering multiple enterprise B2B products in FinTech from discovery to launch leading to contract renewals.
- Mentored junior designers and engineers, establishing a culture of rapid prototyping and user-centric development.

Product Design Manager

Triaset | Kuala Lumpur, Malaysia
October 2017 - October 2019

- Orchestrated all design initiatives for a Treasury Trading Platform, using rapid prototyping and testing to validate core flows.
- Redesigned a Treasury Management enterprise solution from the ground up, securing adoption by 4 major banking clients and positive stakeholder feedback.
- Drove go-to-market alignment by articulating a cohesive product vision and roadmap.
- Accelerated feedback cycles by equipping the team with interactive, high-fidelity prototypes used in client presentations.

UI/UX Designer

Triaset | Kuala Lumpur, Malaysia

October 2014 - October 2017

- Drove design of the company's first SaaS product, a B2B treasury and investment management System (TMS)
- Established a robust user-centric design process, introducing effective strategies and tools for capturing client insights.
- Designed operational and analytical dashboards based on client's needs which led to the development of our in-house reporting tool.
- Built and maintained a scalable design system consistent with brand and UI standards.
- Achieved 80% task completion across core flows.
